Treaty of environmental education for sustainable societies and global responsibility: challenges remain

32 treaties were elaborated

Treaty of environmental education for sustainable societies and global responsibility

Letter of Principles of the Brazilian Network of Environmental Education and other interlaced networks
Introduction:

(...) To prepare for the necessary changes depends on the collective understanding of the systemic nature of the crises that threaten the future of the planet.

(...) are Inherent to the crisis the erosion of basic values, the alienation and non-participation of almost the totality of individuals in the construction of their future. "

Principles:

1. Education is a right for all, we are all apprentices and educators.
Principles:

4. Environmental education is not neutral, but ideological. It is a political act, based on values for social transformation
Principles:

14. Environmental education requires a democratization of mass media and its commitment to the interests of all sectors of society.
To another possible world
another education is necessary
“Washing one's hands of the conflict between the powerful and the powerless means to side with the powerful, not to be neutral.”

Paulo Freire
